1 in 5 women will develop a pelvic mass in their lifetime

WHAT PROVIDERS ARE SAYING

"The OVA1® test helped detect malignancy in the earliest stage, which led to referral of the patient to the specialist and improved her chance of survival."

-- Thomas Greenwell, M.D.
Gynecological Oncologist

WHAT PATIENTS ARE SAYING

"I would tell others that if your doctor recommends that you get an OVA1 test to not be afraid. The results really helped me and I'm very happy that we chose OVA1."

-- Samantha

"My doctors found a mass on my right ovary and ordered OVA1. Thankfully my result was low risk and my OB/GYN did the surgery. It gave me peace of mind before going into surgery."

--Judy

"More women and healthcare providers should know about OVA1. After having several other tests done (an ultrasound, MRI, and a CT scan), OVA1 truly helped me understand my risk level."

--Amy

has a 96% rate of detection for risk of early stage ovarian cancer in a pelvic mass patient. The current testing, CA-125 has only a 69% rate of detection.

RISK FACTORS, SYMPTOMS AND SIGNS OF OVARIAN CANCER

- Age
- Ethnicity
- Family history of ovarian cancer or other cancers
- Symptoms like bloating, pelvic pain, frequent urination, feeling full quickly or weight loss
- Suspicious features in a pelvic mass seen on ultrasound

OVA1® helps you and your provider decide with confidence what course of action is right for you.

OVA1® SUPERIOR EARLY DETECTION

Survival rates are greatly improved the earlier ovarian cancer is found. OVA1® outperforms the other tests at detecting risk for earlier stage ovarian cancer in patients with a pelvic mass. An elevated OVA1® score is not a diagnosis of cancer; it indicates increased risk.

OVA1® is a simple blood test cleared by the FDA that calculates a score based on five blood test results and menopausal status. Your score, along with your ultrasound results and other risk factors, can alert your provider if you have an increased risk of ovarian cancer.

OVA1® should not be used without an independent clinical evaluation and is not intended to be a screening test or to determine whether a patient should proceed to surgery, incorrect use of the OVA1® test carries the risk of unnecessary testing, surgery, and/or delayed diagnosis.

COMMON Q&A FOR OVA1®

Q: What doctor should I go to?

A: If you have an elevated cancer risk, you would benefit from a consult with a Gynecologic Oncologist.

Q: Will insurance cover OVA1®?

A: Yes, we accept and bill all insurances. Our billing experts work directly with your insurance to determine coverage. Most patients pay no more than \$195.

Q: Has the FDA cleared OVA1®?

A: OVA1® has been cleared for women that are:

- Over 18 years
- Have a pelvic mass
- Have surgery planned
- Have not yet been referred to a Gynecologic Oncologist

Q: How can I benefit from OVA1®?

A: Some of the benefits of OVA1® include:

- Appropriate referral
- Timely medical management
- Improved survival and outcome when cancer risk detected at early stage.
