

**Patient Info**

 Last Name: SAMPLE  
 First Name: PATIENT  
 MRN: 12345  
 DOB: 07/01/1980  
 Age: 40  
 Gender: FEMALE  
 Ethnicity: African American

**Provider Info**

 Ordering Provider: PROVIDER  
 Practice Name: OBGYN OFFICE  
 Street Address: 123 Main Street  
 City, State, Zip: ANYTOWN, ST 01234  
 Tel: 555-555-5555  
 Fax:  
 Copy-to-Physician:  
 Fax:

**Laboratory Info**

 Accession No: A0000789  
 Client No: 1234A  
 Collection Date: 06/02/2020  
 Received Date: 06/03/2020  
 Final Report Date: 06/04/2020

**Clinical Information:**
**Menopausal Status:**  Premenopausal

| Test Name           | Result   | Status   | Reference Range |
|---------------------|----------|----------|-----------------|
| SARS-CoV-2 Antibody | Positive | Positive | n/a             |

**Interpretation:** Abnormal results suggest recent or prior infection with SARS-CoV-2. Clinical correlation is recommended. Results should not be used as the sole basis to diagnose or exclude recent SARS-CoV-2 infection. False positive results infrequently occur due to prior infection with other human Coronaviruses.

**Notes:**
**Methods and Limitations**

Elecsys® Anti-SARS-CoV-2 is an immunoassay intended for qualitative detection of antibodies to SARS-CoV-2 in human serum and plasma (K2-EDTA, K3-EDTA, Li-heparin). The test is intended for use as an aid in identifying individuals with an adaptive immune response to SARS-CoV-2, indicating recent or prior infection. The electrochemiluminescence immunoassay "ECLIA" is intended for use on cobas e immunoassay analysers. The assay uses a recombinant protein representing the nucleocapsid (N) antigen for the determination of antibodies against SARS-CoV-2.

**Disclaimer**

Serum or plasma samples from the early (pre-seroconversion) phase of illness can yield negative findings. Therefore, this test cannot be used to diagnose an acute infection. Over time, titers may decline and eventually become negative. Testing with a molecular diagnostic should be performed to evaluate for active infection in symptomatic individuals. It is not known at this time if the presence of antibodies to SARS-CoV-2 confers immunity to reinfection. False positive results for the Elecsys Anti SARS CoV 2 assay may occur due to cross reactivity from pre-existing antibodies or other possible causes. For Emergency Use Authorization only.
