The OVA1® plus report with OVERA® reflex helps you get a better assessment of cancer risk when managing pelvic masses.

**OVERA® Score**

The OVERA® Score is displayed with the status indicating Low or Elevated Malignancy Risk.

**CA-125**

CA-125 is included in the panel of five biomarkers in OVERA® and will be included on the OVA1® results report.

**Additional Biomarkers**

Additional Biomarkers, if ordered, will be reported here with a personalized interpretation.

**Risk of Malignancy**

This table shows the Risk of Malignancy combining, ultrasound, menopausal status and OVERA® value. The higher the score the greater risk of malignancy.

**Interpretation:**

Results in the normal range may suggest low risk for ovarian cancer. Epithelial-Cell Tumors make up an average of 75% of all ovarian cancer tumor types, including serous, mucinous, endometroid, clear cell, and Brenner tumors.
